

# AUDIOHACK ERROR LIST

Ralf Strecker

Effective 2012-10-30

FUNCTION	ERRORS
reverse	-----
invertphase	-----
fadeIn	- if length>filelength
fadeOut	- if length>filelength
gain	- if gain>100dB -> gain=100dB - if gain<-100dB -> gain=-100dB
normalize	-----
gate	??????????? JANN
pipe	???????????? JANN
cut	- if cuttime>filelength - if cuttime<0
delay	- if delaytime>100s -> delaytime=100s - if delaytime<0s

critical error -> program stops

noncritical error -> program continues running

## ERROR LIST

0. no error

1. value > filelength

2. value < 0

3. value < min-value -> setting to min-value

4. value > max-value -> setting to max-value
